

Tahir Can Yıldız

Software Test Engineer

I graduated in Computer Engineering from Kocaeli University and aim to specialize in backend development. I am working on projects focused on n-tier architectures and have completed several. Additionally, I have been conducting unit, integration, API, and end-to-end tests to enhance project quality. You can find more details on my GitHub repository.

Eğitim Bilgileri

2018 - 2024

Lisans

Kocaeli University - Computer Engineering

İş Deneyimi

Sirius AI Tech

Software Test Engineer [2024.08.01 - Halen çalışıyor]

I conducted tests on active projects to improve quality, including unit tests, integration tests, API tests, and end-to-end testing.

Avcılar Municipality

IT Department Intern [08/2020 - 09/2020]

As part of my mandatory internship, I completed a one-month internship at the IT Department of Avcılar Municipality. During the internship, I worked primarily on hardware.
